

# LIMNOLOGICA

- Ecology and Management of Inland Waters -

LIMNOLOGICA publish papers dealing with any aspects of ecology and hydrobiology of inland waters and adjacent biotopes and reviews, discussions, and essays that develop limnological-ecological theory (including all qualitative and quantitative aspects of planktonic, periphytic, benthonic, neustonic, and nektonic organisms, nutrient and energy flow, bioindication, biomonitoring, water intern control mechanisms, ecological modelling and simulation, biological-ecotechnological water quality management, protection of water and restoration). Not acceptable is purely hydrological, hydrophysiological, biochemical, physiological, genetical, or marine biological work, that, while using inland water test organisms, is unrelated to the scope of LIMNOLOGICA.
